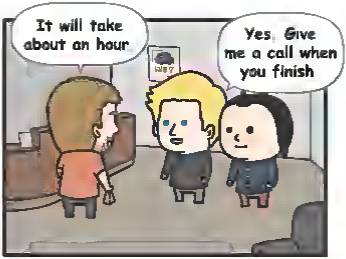
Buying a Car: Part1

Cindy.

This was the first second hand car
thot we bought since we moved to England.

She sometimes broke down so we needed to fix her a few times, but she did very well for the last 4 years.



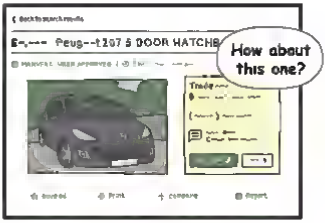
2 weeks ago,
Cindy was in the garage.

MOT TESTING

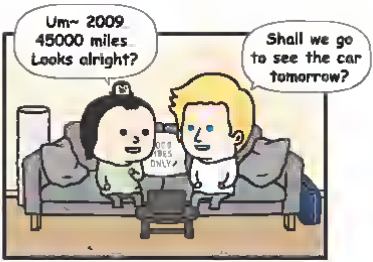
Because we needed to have an MOT, and it's the law that our cars have to pass the MOT test every year.

This year,
Cindy's MOT test was very bad.

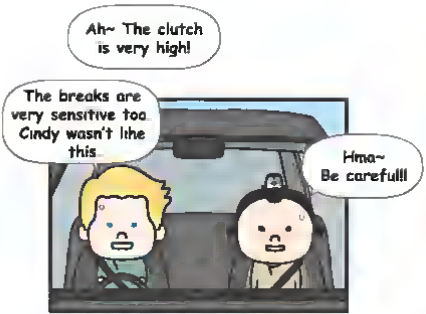
So we decided to buy another car.



We started to look up second hand car sales.



Then we found a car that we liked,
so we visited the garage to see the car.

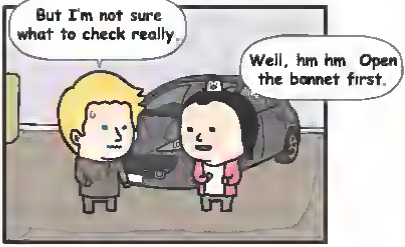


Ah~ The clutch is very high!
The breaks are very sensitive too. Cindy wasn't like this.
Hma~ Be careful!!!

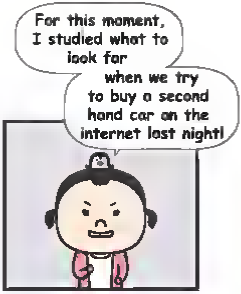
After a test drive,
it didn't feel bad.

We had only a few days to think about it.

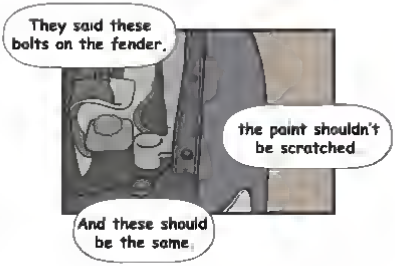
And then revisited the garage.



Both of us had no idea about the car.



So I had prepared the night before



They said these bolts on the fender.
the paint shouldn't be scratched
And these should be the same.

We've got to check the silicon on the wheelhouse?
Where is it? Is it this?

Like this, I checked many things
that I had learned.

And the result was...

. . . very hard to say.
